

a Corporate Executive
~~a Researcher~~

SUBJECT: A transitive letter to Mrs. Colleen Wittoesch (a German descent/Catholic), a ~~Researcher~~, also a Survivor of Stage IV Melanoma Cancer, to advocate a Cancer Healing Plan Completeness under a new SCOPE:

- **Timely:** Circulate and metabolize the drugs. Nourish.
- **Mobilize our strengths** – (i.e., minds). I hold the key here — ChatGPT sheds a light on the mystique Catholic/Christianity of Theology, Scripture, & Bible with a great companion of the Western Latin Philosophy.

Nashville, Tennessee
October 15th, 2025

Mrs. Colleen Wittoesch
Patient and Family Advisor
The University of Texas – The MD Anderson Cancer Center @ Houston, Texas

Back in 1999, I worked as a Chemical Engineer in Texas for Honeywell and Phillips 66 Petroleum Refinery (Borger's Plant) after I graduated a year earlier from Vanderbilt University in 1998.

I got accepted in 2005 into the Doctor of Pharmacy Program at Duquesne University in Pittsburgh, Pennsylvania. I was a pharmacist intern at University of Pittsburgh Medical Center (South Side); however, I didn't complete this study. I worked in a hospital pharmacy for the past 20 years, and now I just turned to my private practice in e-commerce and research.

Your background is in Geophysics (MS degree) and once was working in this field in Houston, Texas, so I am certainly sure that you and I are on the same pages with the Petroleum Exploration (or Refinery).

However, I want to talk about Cancer/Oncology Treatments! I am not a patient. I once was an early Covid-19 vaccine inventor with a DNA fake Covid Virus Model based on a new field – Pharmacogenomics vs. an official vaccine with mRNA-coded strands model based on the Microbiology by the two physician scientists – later awarded with the Nobel Prize in Medicine in 2022. Before that, I was a pioneer in providing a medication counseling service managed by a Clinical Pharmacist with many strategies to overcome the limited conducts and protocols with the physicians and patients when the Medicare Prescription Part D became effective on January 1, 2006 – when I had just joined my pharmacy study a few months earlier!

As making many straits, I strongly believe in the new opportunity – or another breakthrough – this time is for “Tuning the Care and Treatments for Cancers to the Heal Completeness!”

The human body is now proved very strong and capable to seek and destroy the tumors (or cancer cells) – or defend our self-body. We understand the theory and can formulate them – Yeah, Nobel in Medicine in 2018 was awarded for the discovery of the mechanism (enzyme) that can restrain this work of our body.

So, now ...

- **Timely:** Circulate and metabolize the drugs. Nourish.
- **Mobilize our strengths** – (i.e., minds). I hold the key here — ChatGPT sheds a light on the mystique Catholic/Christianity of Theology, Scripture, & Bible with a great companion of the Western Latin Philosophy.

I just made the introduction and the transparency of this idea to you. Now, you are encouraged to visit the website of my wellness clinic business with my supported articles – which I published on LinkedIn from time to time! (<http://www.EdgeWellnessClinic.com>)

I am looking forward to hearing from you.

**Schooled at Ivy League(s): Vanderbilt and Johns Hopkins.*

SUBJECT: (Real Case) Ms. Alison Feller, very young, is in treatment for Stage IV Metastatic Breast Cancer (began in 2023). She is the host of the popular Ali on the Run Show podcast in the State of New Hampshire. I picked her case/profile on GoFundMe.com for my business clinic as a Second Opinion Consultant.

The doctors and the hospital at this moment have given up their treatments for her as she is coming to this Serious Stage. I, or my Clinic, have a magic bullet SCOPE as the new discovery and proven medical and mind technologies just arrived. The cost is also an issue. We are medical researchers, so this plan should be treated as a Second Opinion and forwarded to a physician (or group) for its best optimal.

Chemo + Timely + Nourish + Boost Our Body's Immune Systems Operations:

Right now: Spread to bone – Stage 4 Breast Cancer: Use Chemotherapy as this drug targets everywhere – not like my traditional aim to use drug(s) in assisting our body's immune systems to seek and destroy tumors (or cancer cells).

As the cost is an issue, then I suggest an infusion chemo drug – based on its description/function. Here is one option – Doctor might choose a suitable one:

- **Paclitaxel** (or Taxanes group): *“works by interfering with the ability of cancer cells to divide, stopping the cells from repairing themselves or making new cells.”* (quoted)
- **Timely** is important as drug to absorb and distribute immensely throughout the body – Our strength (mentality/immune systems) will help in this distribution and fight efficiently. The drug's manufacturer suggests – we take the lowest duration time and then even further reduce it – (suggest 2 hours every week → divide into small amounts stretched out through the week. Should adjust the time – not every week as required now).
- **Nourish** – not like a regular nutrition – need to act rapidly and efficiently – as drug: Leucovorin IV Injection – *“treats anemia by supplying folic acid that is needed for red blood cell formation”* – so

“treat certain types of anemia and, more recently, for some neurological conditions.” (as a combo with Chemo).

- **Be active:** be awake, mindful (think positively, listen to music or Bible lectures), make small exercise, have family/friend support systems.

After 2 or 4 weeks, the tumors (cancer cells) are suppressed – then tackle with fine drugs – TRY TO STAY AWAY From CHEMO DRUG – use immunotherapy or regenerative drugs to help and let our body’s immune systems do the correction/pacification and regenerate and nourish the cells.

Recap: My motto – I still use drug as a treatment, but the difference is Timely – to distribute immensely and thoroughly, and other important factors – your mind, your strength, nourishment (IV supplements, not food), and your body’s immune systems are very important and decisive factors! As mind – it’s your pleasure and hope. I just found the very interesting Catholic/Christianity – God (Jesus) is REAL at one time in the past. Elon Musk set the first man from our Earth to another planet – MARS very soon!

The Catholic/Christianity Bible and The Western Latin Philosophy are now a treasure with many mystiques to enjoy and discover (ChatGPT/AI provides). Listen to the audio (music/Bible preaches) while you are in medical treatment.

From the Desk of Winston Vo – specializing in chemical engineering, hospital pharmacy, & control systems – under the guidance of Lawyers Dad & Uncle.

Schooled at Ivy League(s): Vanderbilt and Johns Hopkins.

Bio: A Chemical Engineer & Mathematician with some training/studies in hospital pharmacy. Graduated from the Ivy Leagues: Vanderbilt & Johns Hopkins.

A pioneer – placed the Clinical Pharmacist in an active role in medication management services, as a job/career, not just dispensing and answering at requests since August 2005 as a Doctor Pharmacy Student at Duquesne University – Mylan School of Pharmacy in Pittsburgh, Pennsylvania. Intern job at University of Pittsburgh Medical Center – South Side.

A first and early inventor (03.10.2020) of Covid-19 vaccine based on a DNA – fake Covid Virus model (like flu virus in FLU vaccine) from a new field – Pharmacogenomics. The official Covid-19 vaccine (Nov. 2020) is a mRNA coded strand of Covid Virus – similar to ours (DNA – more accurate) but required up to 3rd booster from their Microbiology field – these two physician scientists later were awarded with Nobel in Medicine in 2022.
